Properties

Product Weight : 6.32 lb/gal

Flash Point: Propellant < 0° F

Coating System

VHT provides a multi-high performance coating system for the ultimate in protection and quality. This system includes surface preparation and Nite-Shades.

Prep SP445 Prep Spray

Coat SP999 Red Nite-Shade

Uses

Tail Lights, Fog Lights, and Turn Indicators

Surfaces:

- Plastic

Application

Caution: For maximum product performance read entire label and directions prior to paint application

Removing the substrate from the vehicle is recommended for ease of application. Prepare surface by removing any oil, grease, wax, or road tar. For best results, wipe down with a grease and wax remover and a clean cloth to clean the surface.

Mask-off surrounding areas to protect from overspray. Use temperatures between 60° F (16° C) and 95° F (35° Cs) and when humidity is less than 60%.

Shake can vigorously for 1 full minute after mixing ball moves freely. Shake can for 10 seconds after each minute of use. To spray, hold can parallel 8 to 10 inches from the surface to be painted and use in an even sweeping motion. Apply one light coat or just enough to change lens color. DO NOT exceed more than 3 coats or light may not show through. Dries to the touch in 1 hour. Can be handled in 3 hours. Covers approximately 12 to 14 square feet.

The EZ TOUCH® Nozzle requires 50% less finger fatigue than a standard nozzle. It allows for greater coverage and less overspray.

Packaging

Fill Weight: 10.25 oz

Per Case: 6 cans

Case Weight: 5.46 lbs

Cases/Pallet: 156

Units/Pallet: 936 cans
